PROFESSIONAL EXPERIENCE

Work-Study Data Scientist ***Washington, DC***
Georgetown University School of Medicine July 2026 – Present

- Modeled 6 years of residency readiness survey data as a star schema (fact and dimension tables across 17 competencies), powering a multi-page dashboard comparing Georgetown against national results
- Built a Python pipeline that ingests national and school-level survey data into one dataset, replacing manual Excel cleanup
- Built a Net Readiness Score to benchmark Georgetown against national results across 17 competencies, weighting by respondent count so small specialties don't distort Georgetown vs. national comparisons
- Automated a manual process for combining clinical exam score reports across 6 clerkships into one historical dataset going back to 2016, with built-in quality checks to keep records accurate
- Communicated findings to non-technical stakeholders through dashboards, slide decks, and written summaries

Analytics & Data Intern ***Washington, DC***
AL-Monitor April 2026 – August 2026

- Built Python pipelines pulling subscription data (subscriber counts, MRR, churn) from the Chargebee API to automate the monthly KPI report, eliminating about 3 hours of manual downloading, reformatting, and charting per report
- Automated the Waterfall report, an overview of subscription health across individual, group, and omnichannel plans
- Ingested newsletter campaign performance data from the Campaign Monitor API into a clean dataset for marketing reporting
- Partnered with 3 senior editors to scope their reporting needs and built a Looker Studio report that brings article and campaign performance data into one place, supporting data-driven content decisions
- Maintained daily and monthly Looker Studio dashboards and delivered data pulls and ad hoc analysis on subscriber, newsletter, and article performance for editorial, marketing, and leadership teams

Data Analyst ***Ottawa, Ontario***
Department of National Defence September 2023 – August 2025

- Wrote SQL to transform 500K+ records from SAP ERP, SQL warehouses, Lakehouse, and CRM sources for Power BI
- Created and maintained Power BI dashboards and Excel-based reporting tools used by 200+ stakeholders
- Built PowerPoint briefings on KPIs and performance insights, presenting findings to all levels of the organization
- Worked with data engineers and SMEs to turn business requirements into pipeline specs and data models feeding Power BI
- Cleaned and validated large operational datasets (duplicates, missing values, inconsistencies) and documented business rules
- Built an intake portal with Power Automate and Azure DevOps that reduced manual data entry by 80%

EDUCATION

Master of Science in Data Science and Analytics ***Washington, DC***
Georgetown University August 2025 – May 2027

- **Relevant Coursework**: Database Systems, Machine Learning, Data Visualization, Probability & Statistics, NLP

Honours Bachelor of Commerce (Business Technology Management) ***Ottawa, Ontario***
University of Ottawa September 2020 – December 2024

SKILLS

- **Data Modeling & SQL:** SQL data modeling (joins, aggregations, data validation), PostgreSQL, dimensional modeling (star schema, fact and dimension tables), data documentation
- **BI & Reporting:** Looker Studio, Power BI (DAX, Power Query), Tableau, Google Analytics, Excel and Google Sheets (pivot tables, XLOOKUP), KPI reporting, dashboard design
- **Programming & Pipelines:** Python (pandas, NumPy, Jupyter), REST APIs (Chargebee, Campaign Monitor, Microsoft Graph), ETL pipelines, workflow automation, R, Git/GitHub
- **Marketing & Business Data:** Marketing analytics, subscription metrics (MRR, churn, subscriber growth), newsletter campaign performance, audience engagement
- **Methods & Practices:** Data quality validation, root-cause analysis, requirements gathering, cross-functional collaboration

PROJECTS

U.S. Airline Performance Analysis (View) | Georgetown University – DSAN 6300 (Database Systems)

- Designed a dimensional model (fact and dimension tables) in PostgreSQL and used SQL to analyze 600,000+ flight records
- Documented data sources, query logic, and methodology, and built an interactive dashboard for a non-technical audience

Menendez Brothers Media Narrative Analysis (View) | Georgetown University – DSAN 5000

- Built ETL pipelines integrating Guardian, YouTube Data, Google Trends APIs and OCR text, processing 8,300+ raw files
- Designed data schemas and model-ready tables for repeatable analysis of sentiment and audience behavior trends
